1949 PRODUCTION TOPS THAT OF 1948

The Federal Planning Commission recently announced the fulfillment of the economic plan for 1949. In the following table, the first column represents the percentage of the 1949 plan completed, and the second represents the increase in 1949 as compared to the actual 1948 production (1948 = 100). At several places the second column is missing because of major organizational changes (the transfer of federal enterprises to republic administration), which makes exact comparison difficult.
